THE INViSIBLE NEEDLE™

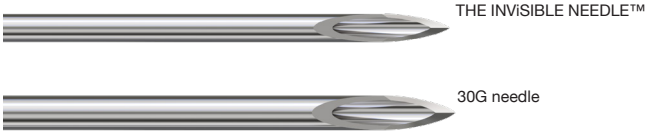
Minimal bleeding
Near painless experience
Save up to 42 µl BoNT per needle
Significant cost savings

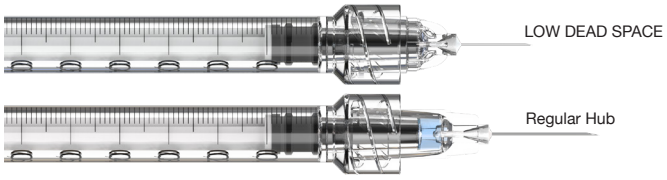
THE INViSIBLE NEEDLE is the first needle of its kind and the thinnest needle available to date. Technology advancements have made it possible to make this needle 33% thinner than a 30G needle and 14% thinner than the TSK 33G needle. This extremely small diameter of THE INViSIBLE NEEDLE results in a near painless experience for patients and is ideal for BoNT injections.

Features & Benefits



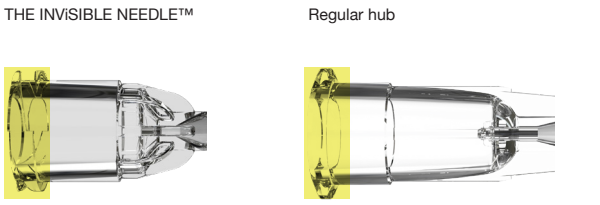
Benefit	**Near painless injection**
Benefit	**Better overall patient experience**

Technology advancements have made it possible to make THE INViSIBLE NEEDLE 33% thinner than a 30G needle (used for syringes with fixed needles) and 14% thinner than the TSK 33G needle.



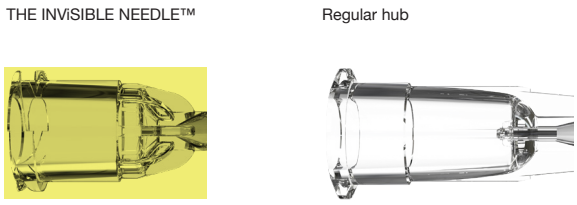
Benefit	**No product loss**
Benefit	**Significants cost savings**

The Low Dead Space hub is designed to reduce the effective space left behind in the needle hub as close to zero. This new patented LDS hub design results in savings of up to 42 µl of product.



Benefit	**Reduced pop-off risk**
Benefit	**Prevents leakage**

THE INViSIBLE NEEDLE allows for an even tighter luer lock connection because of the built-in exterior treading. Preventing "pop-off" of the hub when exposed to high pressures.



Benefit	**No flexing**
Benefit	**Prevents leakage**

THE INViSIBLE NEEDLE hubs are made using an extremely hard polymer preventing "flexing" of the hub when exposed to high pressures which ultimately prevents leakage and needle pop-off.

Available sizes

Code	Description	Inch	Pieces in box
LDS-02009	THE INViSIBLE NEEDLE 9mm	3/8"	100
